

## The End is Near

“The end is near.”

That’s what the old man said. At first, I didn’t believe him. But then, lots of weird stuff started happening. Animals fleeing, currents reversing, earthquakes, snowstorms in April, hurricanes, Nuclear Power Plants melting, etc.

Then it happened. The aliens showed themselves. Or, at least, the giant weapon on the far side of the moon. It’s an EM Device that messes with the Earth’s magnetic field, creating devastation.
